

Incident Response Services

Don't wait for an information security breach to happen to realize you're not prepared. During an active incident, IT staff must already have a comprehensive incident response plan in place that details roles and responsibilities, procedures and communications. Without the clarity of a tested plan, an information security breach will become worse and ultimately, more costly.

Having a plan is important. Having a team at your disposal is critical. HEMISPHERE can provide you with the necessary tools to reduce the cost of incident response.

FACTOID: 80% of a cyber insurance policy is exhausted during the incident response phase of a claim. This leaves only a small fraction of a policy's value to address breach notifications, credit monitoring, or legal defense preparation.

CASE STUDY: In early 2017, HEMISPHERE worked with a law firm's client in response to a data exfiltration case. The victim was a small Government Contractor located in the Mid-Atlantic region but had to respond to over 30 state attorney generals increasing the cost of the event significantly.

Man Hours:

CEO - 27

CFO - 45

Director of IT - 110

Attorney - 57 hours and still not fully resolved

The majority of the time spent was learning what was needed to be done and why. Let HEMISPHERE help you with a fully integrated solution that allows you to have a digital forensics incident response team, call center, breach notification, legal support, and credit monitoring.

HEMISPHERE's strategic alliances will allow you to have peace of mind in outsourcing unfamiliar and overly burdensome tasks that are designed with the small and medium size business owners in mind. Our experts are highly trained and experienced in supporting criminal and civil matters following strict guidelines defined by the U.S. Department of Justice and NIST Special Publication 800-161 "Computer Incident Security Handling Guide"

Your Gateway To Cyber Risk Management
